

Louisiana-Pacific Corporation	)	Department
Aroostook County	)	Findings of Fact and Order
New Limerick, Maine	)	Part 70 Air Emission License
A-327-70-B-M	)	Amendment #1

After review of the Part 70 Administrative Revision application, staff investigation reports and other documents in the applicant's file in the Bureau of Air Quality, pursuant to 38 M.R.S.A, Section 344 and Section 590, the Department finds the following facts:

## I. Registration

### A. Introduction

FACILITY	Louisiana-Pacific Corporation
LICENSE NUMBER	A-327-70-A-I
LICENSE TYPE	Part 70 Administrative Revision
NAIC CODES	321219
NATURE OF BUSINESS	Oriented Strand Board Manufacturer
FACILITY LOCATION	240 Station Road, New Limerick, Maine

### B. Description of Part 70 Minor Modification

LP has requested the incorporation of additional language to clarify two parameter monitor requirements: Minimum RTO temperature and maximum RTO outlet airflow.

LP shall maintain and operate the following parameter monitors continuously:

Dryer Vent and Press Vent RTO combustion chamber temperature. **These temperatures shall be maintained above the minimum temperature at which compliance with specified licensed limits was demonstrated during any emissions testing that demonstrated compliance.**

Dryer Vent and Press Vent RTO outlet air flow monitor. **This air flow shall be less than the maximum airflow at which compliance with specified licensed limits was demonstrated during the last emissions testing.**

**Bold** indicates language added in this Part 70 Administrative Revision.

Condition (50) was also revised for clarification purposes.

C. Application Classification

The application for LP clarifies wording in a licensed condition and does not increase emissions or reduce monitoring, reporting, or record keeping requirements. As such, this application is being processed as a Part 70 Administrative Revision.

**ORDER**

The Department hereby grants Part 70 Administrative Revision A-327-70-B-M, subject to the conditions found in Part 70 License A-327-70-A-I and in addition to the following conditions:

**The following shall replace Condition (27) of Part 70 License A-327-70-A-I:**

(27) Dryer Vent & Press Vent RTO Parametric Monitors[MEDEP Chapter 140, BPT]

LP shall maintain and operate the following parameter monitors continuously as part of the Parametric Monitoring Plan required by Federal Consent Decree CV93-0869 and approved by the EPA:

Dryer Vent and Press Vent RTO combustion chamber temperature. These temperatures shall be maintained above the minimum temperature at which compliance with specified licensed limits was demonstrated during any emissions testing that demonstrated compliance.

Dryer Vent and Press Vent RTO outlet air flow monitor. This air flow shall be less than the maximum airflow at which compliance with specified licensed limits was demonstrated during the last emissions testing.

Note, “continuous” is defined as: Equally spaced data points with at least one data point for each successive 15-minute period. A minimum of three evenly spaced data points constitutes a valid hour.

Each parameter monitor must record accurate and reliable data. If the parameter monitor is recording accurate and reliable data less than 98% of the source-operating time within any quarter of the calendar year, the Department may initiate enforcement action and may include in that enforcement action any period of time that the parameter monitor was not recording accurate and reliable data during that quarter unless the licensee can demonstrate to the satisfaction of the Department that the failure of the system to record accurate and reliable data was due to the performance of established quality assurance and quality control procedures or unavoidable malfunctions.

A-327-70-B-M	3	Amendment #1

**The following shall replace Condition (50) of Part 70 License A-327-70-A-I:**

**(50) A. Annual Emission Statement**

In accordance with MEDEP Chapter 137, the licensee shall annually report to the Department, by September 1, the information necessary to accurately update the State's emission inventory by means of:

- 1) A computer program and accompanying instructions supplied by the Department;  
or
- 2) A written emission statement containing the information required in MEDEP Chapter 137.

Reports and questions should be directed to:

Attn: Criteria Emission Inventory Coordinator  
Maine DEP  
Bureau of Air Quality  
17 State House Station  
Augusta, ME 04333-0017

Phone: (207) 287-2437

**B. Biennial Emission Statement**

In accordance with MEDEP Chapter 137, the licensee shall report every two years, by September 1, (1996,1998,etc.) to the Department the information necessary to accurately update the State's toxic air pollutants emission inventory by means of a written emission statement containing the information required in MEDEP Chapter 137.

Reports and questions on the Air Toxics emissions inventory portion should be directed to:

Attn: Toxics Inventory Coordinator  
Maine DEP  
Bureau of Air Quality  
17 State House Station  
Augusta, ME 04333-0017

Phone: (207) 287-2437
